About Company

PRP is a flexible low-volume, high-precision, manufacturing company.

Our core business is hydrological equipment manufacturing with the capability to produce small high-precision components.

Headquartered in Columbus, Ohio, PRP is a veteran-owned business serving business-to-business and business-to-consumer markets globally for almost 100 years.

Differentiators

- Manufacture a wide variety of hydrological and high-precision products, all in the US.
- High-quality production processes ensure product is made to exacting standards, providing thousands of customers the right tools and equipment to perform the job.
- Experienced and dedicated team committed to understanding and meeting unique and individual needs.
- Durable and reliable manufacturing equipment ensures work is completed safely, efficiently and accurately.
